Get the Pathways App on your Android phone

Test version (alpha). Takes about 5 minutes.

Our app isn't searchable in the Google Play Store yet. Google reviews new apps first, and that takes a little time. Until then, you can still get it with a special link. Good news: no more saving it from your web browser! (Iphone users – hang tight, we'll get to you next!)

Your download link

On your Android phone, tap here: **Open the app download page**

Reading this on paper? Open your phone's camera and point it at the code.

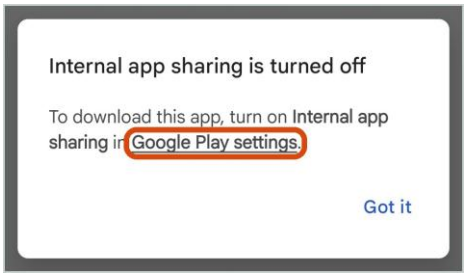

1 Open the link

Tap the link above, or scan the code, on your Android phone.

2 Tap "Google Play settings"

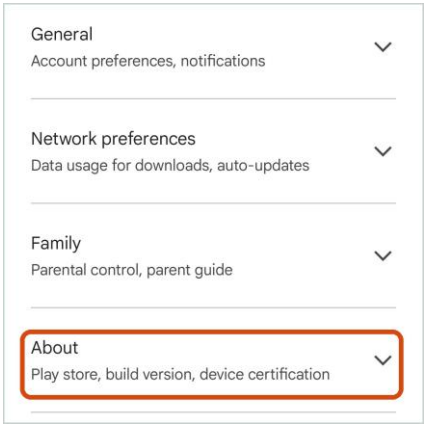

You will probably see a message that says **Internal app sharing is turned off**.

Tap the underlined words **Google Play settings**. This takes you right where you need to go.

3 Open the About section

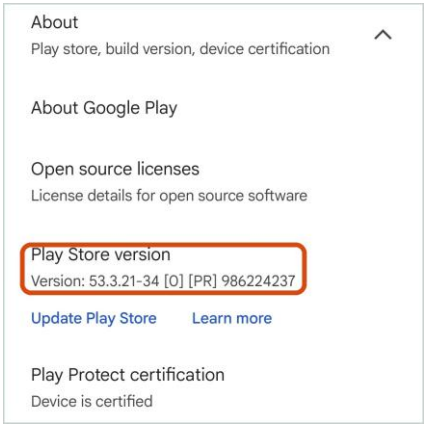

Tap **About** to open it.

4 Tap the Play Store version 7 times

Find **Play Store version**. It says “Version: 53…” under it.

Tap it **7 times in a row**. A short message will say you are now a developer. That just unlocks a few extra Play Store settings.

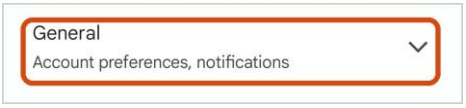

5 Close the About section

Tap **About** again to close it.

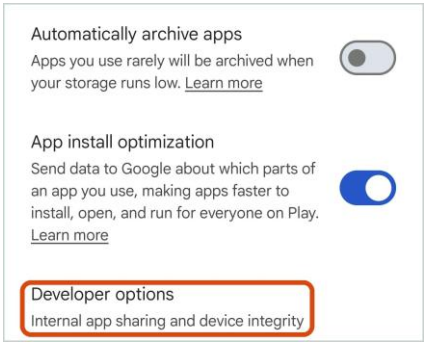

6 Open the General section

Scroll back up and tap **General** to open it.

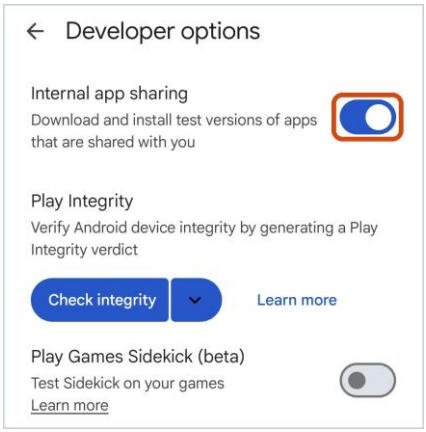

7 Tap Developer options

Scroll down and tap **Developer options**.

8 Turn on Internal app sharing

Tap the switch next to **Internal app sharing**. It turns blue when it’s on.

9 Download the app!

Go back to the link from Step 1 (if it doesn’t automatically take you there) and tap it again. Tap **Install**. That’s it, you’re done!

Stuck? No problem. Contact Katie at kbroadfoot@btowpathways.org and I’ll help you.
